EDUCATION

James Madison University
BBA, Finance.

Harrisonburg, VA
May 2026

EXPERIENCE

Wealth Management Associate

June 2026 – October 2026

Certified Financial Services

Paramus, NJ

- Supported clients through the financial planning process, gathering and organizing financial data to develop personalized planning strategies
- Assisted advisors with portfolio reviews, account servicing, and preparation for client meetings across investment and insurance solutions
- Communicated with clients on account updates, planning recommendations, and next steps to strengthen long-term client relationships

Equity Trading Intern

January 2026 – February 2026

TJM Investments LLC

New York Stock Exchange

- Shadowed Designated Market Makers from GTS, learning to read charts and analyze intra-day data by sector
- Relayed real-time order-flow execution information between institutional desk traders and sell-side traders
- Analyzed traders' adoption strategies and acted on behalf of upstairs traders, conforming to execution instructions

PROJECTS

Equity Valuation Project: Dutch Bros

September 2025 – January 2026

- Conducted a bottom-up equity valuation of Dutch Bros using DCF, residual income, and trading multiples
- Built 5-year pro-forma financial statements and forecasted FCFF to estimate intrinsic value; calculated WACC using CAPM and market debt yields to determine the appropriate discount rate

Asset-Pricing Regressions: Fama-French and Carhart Models (Python)

February 2026

- Implemented Fama-French 3-Factor and Carhart 4-Factor models using CRSP/Compustat data from WRDS; estimated alphas and factor loadings to evaluate fund and portfolio performance

Portfolio Optimization Simulation (Python)

February 2026

- Conducted Monte Carlo simulations and mean-variance optimization using historical WRDS data; generated efficient frontier, optimal weights, and risk-return tradeoff visualizations

MLB Hitter Valuation Analysis (Python)

January 2026

- Built a Moneyball-style player valuation model analyzing 277 qualified MLB hitters from the 2025 season
- Engineered a weighted composite efficiency score using WAR and RAA via z-score normalization; calculated cost-per-performance ratio to identify undervalued and overvalued contracts

NLP Analysis of SEC EDGAR 10-K Filings (Python)

March 2026

- Used NLTK to scrape, clean, and analyze 10-K filings; performed sentiment scoring, keyword extraction, and linguistic readability analysis commonly used in financial research

ACTIVITIES & LEADERSHIP

Financial Professionals

2022 – 2026

Member

- Active member of student-run finance organization at James Madison University; attended industry speaker events and engaged with professionals across investment banking, trading, and asset management. Participated in professional development programming including interview preparation, resume workshops, and career mentoring.
